

DUNE designed by Caroline Beaupère

Winner of Interior Design Magazine's Best of Year 2014

We are proud to announce that DUNE designed by Caroline Beaupère has won Interior Design Magazine's Best of Year 2014!

The award winning tub is part of a larger AF I Architectural Collection made in collaboration with AF I Design Lab. AF I Architectural Collections are collaborative efforts between AF I New York and the architectural community, inviting architects and designers to create product lines that express the spirit of New York and global architecture for the bathroom. AF I New York helps support these efforts through the design and production of products expressed as three dimensional functional art forms.

In this collaboration New York / French Designer Caroline Beaupère creates an alluring bathroom series that embodies one of nature's most interesting and beautiful phenomena. "The Dune Collection", writes Caroline Beaupère, "was inspired by the most serene place I have ever encountered: the Siwa Oasis in the Libyan Desert in Egypt. Surrounded by wind sculpted dunes and majestic mountains, the oasis is a

magical haven, a place out of time where you forget about the outside world. Being able to escape the hectic pace of modern life is a luxury. The whole concept behind the collection was the create a tranquil environment for the ultimate relaxation."

"Là, tout n'est qu'ordre et beauté, Luxe, calme et volupté.
There all is order and beauty, Luxury, peace, and pleasure."
- Charles Baudelaire, "L'invitation Au Voyage"
